As we celebrate a half-century of transformation and growth at The University of Texas at Dallas, we can see that the only constant at UTD is change. Our founders Cecil Green, Eric Jonsson and Eugene McDermott once surveyed North Texas cotton fields with the ambition of building an “MIT of the South” for post-graduate science research. Today we’ve achieved the benchmarks required to qualify for the National Research University Fund, we are recognized as a Carnegie Classification R1 Institution for our extensive research activity, and thousands of graduate and undergraduate students live and learn on our campus.

In many ways, the University is a small Texas city, and our office is committed to keeping that city running, improving, and growing. We are in the process of creating more facilities [page 4], we’re learning to operate more sustainability [page 9], and we have created a department for Economic Development Initiatives [page 11]. To support our expanding institution, we’ve hired new staff [page 9]. Please welcome these Comets when you see them around campus.

The purpose of our work, the people we serve, are never far from our thoughts. In that spirit, this Spring we raised funds for three educational endowments at the 26th Annual Scholarship Golf Tournament [page 6]. Our office also organized several activities to welcome students to the start of a new Fall semester, including our Welcome Booths [page 8].

We take inspiration from the University’s past, but we also see it as a challenge to go further.

Get ready for UTD’s next chapter,

Dr. Calvin D. Jamison,
Vice President for Facilities & Economic Development

Jenny Mizutowicz.
Manager of Economic Development Initiatives

Haywood McNeill [Interviewer]: What path lead you to UT Dallas?

Jenny Mizutowicz: I started my economic development career here in Richardson eight years ago with the Richardson Economic Development Partnership (REDP), where I was lucky to learn from some of the best in the industry. I subsequently spent two years with the City of Carrollton as Manager of Economic Development, where I organized a biannual Manufacturers Roundtable and focused on business retention.

HM: What work does economic development entail?

JM: Economic developers strengthen the tax base and improve the quality of life for the communities they serve. In UTD’s case, the University still owns 100 acres of undeveloped land, so this role will focus on a strategy for developing our remaining land north of campus. As we celebrate the University’s 50th anniversary this year, one of our strategic priorities is to become an “economic engine” for the Dallas-Fort Worth region. I also will be capturing and promoting the economic impact the University has on the entire region, building meaningful community partnerships, and positioning UTD as a neutral convener for the region.

HM: If I followed you for a week, what would I see you doing?

JM: You wouldn’t catch me sitting at my desk often! I’ve spent my first several weeks at the University meeting with internal partners to understand the economic development that is already happening on campus. I’m also beginning to meet with economic development partners in DFW to tell them about our new economic development initiatives so that they know they have an ally and a resource at the University. You’ll hear me saying “research park,” “event center” and “neutral convener” a lot. I’m also starting to plan for our inaugural Economic Development Summit set for November 7.

HM: Let’s talk about the summit.

JM: This is the first of what we hope will be many economic development summits hosted by the University. We will be unveiling the results of our Economic Impact Analysis, as well as introducing our new economic development team and encouraging partnerships.
Dee Lambert, Director of Administration & Operations

Haywood McNeil (Interviewer): How long have you been with UT Dallas?

Dee Lambert: I have been working with F&ED for 6 months (as of September 7), but on August 16, I celebrated my 15th year of working at UT Dallas. I started as an enrollment specialist in the Office of Enrollment Services and remained with (what’s now known as) the Office of Admission & Enrollment from 2004 through 2019. Most recently, I served as the director for the Visitor Center & Admission Events.

HM: If I followed you for a week, what would I see you doing?

DL: Some of everything! I meet with Dr. Jamison regularly to assist him with the completion of administrative responsibilities under the Vice President’s purview. I oversee financial and human resources-related responsibilities and plan/execute events (such as building dedications and groundbreaking ceremonies) on behalf of our department. I maintain frequent contact with my co-workers in Facilities Management, Auxiliary Services and Parking & Transportation to ensure projects are managed and we successfully meet deadlines. I serve on and support several committees, representing the Office of Facilities & Economic Development. I’ve also hired and am now working with our new staff members to establish our newly-created Economic Development entity and we are excited to be preparing for our upcoming Economic Development Summit in November.

HM: What is the best part of your job?

DL: The best part of my job is the wonderful group of people I get to work with. I have been extremely impressed by the creativity and professionalism of the student workers in our office and I respect the daunting tasks my counterparts in Facilities Management and Auxiliary Services manage. Our department literally touches the entire University.

HM: What do you most look forward to the coming year?

DL: I look forward to continuing to learn how to enhance the intricacies of the job, focusing on timely project delivery, providing structure to our operations and looking for ways to increase efficiency in what we do each day. I am also looking forward to seeing the hard work of the amazing individuals I work with each day come to fruition throughout the campus.

UTD Then & Now

Starting as a post-graduate science research center with a handful of buildings, in 50 years The University of Texas at Dallas has grown into a top tier, top rated institution serving over 18,000 undergraduate and 9,000 graduate students in nearly 160 buildings across seven million gross square feet of facilities. From top left, clockwise: the original Laboratory of Earth & Planetary Science, AKA Founders Building, the building’s 2010 renovation; one of the magnolia trees and reflecting pools from that same year’s South Mall enhancement; the Edith O’Donnell Arts & Technology Building, completed in 2013, along with other galleries and studios, it took over the functions of the now-defunct Visual Arts Studio (‘The Art Barn’) from 1978.
Farewell to Carrie Chutes

Carrie Chutes, director of Food & Retail Service, was bid farewell this August at a party held in her honor inside the Faculty/Staff Dining Room. After ten years of service to the University, Chutes will be taking on a position in South Texas. Longtime colleagues traded stories of her early days at UT Dallas, enjoyed “sad emoji” cupcakes and gifted her a few UTD-branded mementos, so she could remember her time here.

Science Building Construction Update

Currently under construction just north of the Science Learning Center, the new Science Building is still on track to open in the Fall of 2020. This 187,000 sq.ft. facility will become the home for the Department of Physics, the William B. Hanson Center for Space Science and the UTeach program. When completed, the building will contain classrooms, offices, 150- and 300-seat lecture halls and The Market dining option—plus laboratories for research and instruction in cryogenics, optics, magnetism and electricity. A special large collaboration space within the Science Building will allow for research and classroom areas to be joined together.

Facilities Management (top row, from left), outgoing director of Food & Retail Service, Matthew Grief, associate vice president for Student Affairs, Gene Christiano, executive chef for Dining Services, Bob Fishbein, associate vice president for Auxiliary Operations & Economic Development, Mario Lozano, coordinator for Housing Operations (bottom row), Craig Lewis, coordinator for Greenhouse and Landscape, Dr. Carolyn Reichert, chair of the Sustainability Committee, Gary Cocke, associate director of Energy Conservation & Sustainability, Calvin D. Jamison, vice president for Facilities & Economic Development, Doug Tomlinson, associate vice president for Facilities Management and Pam Stanley, interim director of Food & Retail Service.

The University of Texas at Dallas was recently recognized with a national Sustainability Innovation Award in Facilities Management by APPA Leadership in Educational Facilities (formerly the Association of Physical Plant Administrators) for implementing innovative methods to reduce food waste by 66%. By reducing the volume of surplus food, diverted leftovers to the Food Recovery Network and partnering with a composting company to convert food waste into animal feed and fertilizer, UT Dallas has exceeded EPA and UN goals to reduce food waste by 50%. Staff representing groups who contributed to the award gathered in the South Mall to celebrate this achievement.
Athletics Concession Stand & Restrooms
Comets fans arriving at the south end of campus to cheer on their favorite team will soon be able to enjoy a larger, more modern replacement to the old concession stand, which will include more seating and restroom space.

Northside Additions
The latest expansion to Northside at UT Dallas promises more housing and retail space within easy reach of campus. Phase 3 of the Northside development will have 246 living units, a mix of furnished one- and two-bedroom apartments and unfurnished three-bedroom town homes, providing space for 370 beds just across the street from classes. Students and neighbors alike will also be able to enjoy our second Starbucks coffee shop.

Welcome Booths
On the first two days of the Fall semester, the Office of Facilities & Economic Development set up “welcome booths” throughout campus, run by staff from various parts of the University. By giving directions, answering questions, and providing information on UTD resources, our staff had the opportunity to connect with new and returning students. The booths also offered UT Dallas trivia games, giveaways and plenty of water.

Block Party
After the Fall 2019 Convocation officially welcomed students back to campus, the UT Dallas Multicultural Center, Radio UTD, Athletics and Auxiliary Services hosted our annual Welcome Back Block Party at Northside. Students enjoyed free food and drinks, live DJs and games while getting to meet new classmates from all over the world.

Housing Operations Building
Construction on the new Housing Operations Building is expected to be completed at the end of 2019. Besides serving as the new home for Housing Operations, this 8,400-square-foot facility will include a workshop and space for bulk storage.

Shop UTD
Pam Stanley (left), interim director of Food & Retail Service at UT Dallas, and Crescentia Trisna, special events associate, organized “Shop UTD” during the Fall semester’s Weeks of Welcome. Hosted in the atrium of the Visitor Center and University Bookstore, this event was an opportunity for students, faculty and staff to become familiar with all the products and services available to them right on campus. In honor of our 50th anniversary, attendees could win food and prizes by answering Comet-related trivia and playing 1969-themed carnival games.

Students and neighbors alike will also be able to enjoy our second Starbucks coffee shop.
The 26th Annual Scholarship Golf Tournament was a great success. This year’s tournament, held on April 26, was once again hosted by Firewheel Golf Park. Nearly 180 players on two different courses—plus 123 sponsors and contributors—came together to raise more than $96,500 for three UT Dallas scholarships:

**Betty and Gifford Johnson Graduate Endowment**
Helps graduate students attend and make presentations at national conferences.

**Patti Henry Pinch Undergraduate Endowment**
Assists undergraduates with research and travel expenses.

**Academic Bridge Scholarship Endowment**
Helps ease the transition from high school to college by providing on-campus housing, advising, mentoring and tutoring to first-generation college students.

On Friday, April 24, 2020, golfers will return to the greens of Firewheel for a special tournament celebrating the University’s 50th anniversary.

Players were able to place bids at a silent auction before the tournament’s “shotgun start.” At the post-tournament dinner, the bidding went live. Golf equipment and travel packages were popular items.

The tournament was played under the rules of Six-Person Scramble. Each member of a team got to hit a tee shot, and the site where the best shot landed became the spot where everyone took their next shot. One score was kept for the whole team. It made for a fast game and a fun afternoon of golf.

From left: Clay Hauser, Terrence Butterfield, Joe Quirk, former University President David Daniel, University President Richard Benson, and Dr. Lawrence Redlinger played the Lakes Course in this year’s tournament with fellow teammate, Vice President for Facilities & Economic Development Calvin Jamison. Their team finished in first place for tournament play in their division.

Venisha Harmon, a Patti Henry Pinch Undergraduate Scholar, thanked the players during dinner for their contributions to the University’s scholarship endowments.
